FLEXIBILITY AT ITS CORE

The Rivo system provides plant operators with a monitoring solution for seamless integration with existing water treatment assets. The plug-and-play modular design incorporates a wide range of input and output ports to help you grow as requirements change. The Rivo system can be easily adapted to give you the greatest flexibility with minimal effort.

Intuitive, high-resolution
touchscreen for easy operation

- High-performance central processing unit
- Reliable measurement and data

Range of integrated
input and output ports

Input:

- Digital process inputs (2)
- 0/4-20 mA input ports (2)
- Temperature input port
- Feedback positioner

Output:

- Relays (2)
- 2 channel mA out module

Plug-and-play modules to
evolve with your business

Robust, compact
design certified to
IP66 certification

Up to 4 flexible
ports for modules

Universal AC input
100-230V or 24V DC

The Next Generation OF ANALYSERS AND CONTROLLERS

- Seamless integration into any water treatment system
- Simple set-up and data management for complete control of water quality
- Optimise chemical usage
- Compliance-focused support to meet disinfection regulations
- Remote management across multiple facilities
- Proven security measures for safe and secure operations
